	Outside Misc. are those outside Ohio that may occasionally check in.													

Report D&C

Total Stations and Active Counties

by Rolling Month

April has shown a continued increase in total participation since the time/band change but far below the peak of fall 2020. Total county participation remains largely flat at around 20 counties.

OHDEN conducted a pair of training Zoom Meeting session for introductory FLMSG in preparation for NVIS Day (see ARESConnect). There were 14 participants including atypical OHDEN stations. Our current training philosophy of mentor based with EC leadership may need rethinking.

OHDEN participated in NVIS Day as a net expanding the Section goals by operating over a 12-hour day and gauging the quality of NVIS propagation by success of passing a FLMSG message. For OHDEN, as a system that includes radio operators needing to perform in an EOC environment, we included practice at generating concise and accurate content of an ICS-213 from somewhat ambiguous instruction. Mid-day NVIS propagation was poor on some bands and we had to resort to longer propagation modes using the OHDEN affiliate station in North Carolina. OHDEN net management is still collecting data from NVIS Day.
