Note: Outside Stations are those outside Ohio but actively involved with OHDEN.													
Outside Misc. are those outside Ohio that may occasionally check in.													

The winter schedule of 160-m for the Tuesday net took its toll on both monthly totals and active counties. The first Tuesday net was superseded by an extended watch period due to a weather event. Adding 160-m capability for net stations is considered a priority and net management secured funding for 4 160-m inductive loaded short antennas for stations committed to using them.
