Total Stations and Active Counties

OHDEN net participation remains relatively flat since November 2021 with perhaps a slight increase this month with the change to the daylight savings time schedule.

Two OHDEN stations have completed their certification for training level 3 with one station completing certification level 2A. There are several other stations working to complete level 2A so this new level is considered a success and the OHDEN Training Plan will be updated to reflect it.

A new station from Mahoning County has been added to the OHDEN roster.
